Executive Summary

Proposed Southeast District Health Department Public Swimming Pool Regulations

Background

Effective July 18, 2026, the Nebraska Department of Water, Energy, and Environment (NDWEE) will no longer conduct inspections or issue operating permits for public swimming pools. Responsibility for administration of the public swimming pool program will be transferred to local governments.

The proposed regulations establish the Southeast District Health Department's local regulatory framework for permitting, inspection, and enforcement of public swimming pools within the Health Department's jurisdiction. The regulations largely incorporate existing State operational and construction standards by reference while establishing local administrative procedures necessary to administer the program.

Key Policy Decisions

The proposed regulations are intended to maintain continuity with the State's existing public swimming pool program while transitioning permitting and inspection responsibilities to the Southeast District Health Department. Key policy decisions include:

- Adoption by reference of the State's existing design, construction, operation, and management standards to maintain consistency across Nebraska.
- Retention of the Nebraska Department of Water, Energy, and Environment's authority over plan review, construction approvals, and variances.
- Establishment of an annual operating permit program administered by the Southeast District Health Department.
- Implementation of a local permit fee schedule designed to recover the costs associated with permitting, inspections, administration, and enforcement.
- Establishment of inspection and enforcement procedures, including authority to immediately close a public swimming pool when conditions present a significant health risk.
- Creation of administrative due process procedures, including notice requirements, hearings, permit suspension or revocation, and appeals.
- Adoption of standard enforcement provisions, penalties, and severability language consistent with other Board of Health regulations.
